The first part of the report  
 was devoted to a general  
 description of the area  
 and the methods used  
 in the investigation.  
 The results of the  
 analysis are given in  
 the following table.  
 The data show that  
 the concentration of  
 the substance is  
 highest in the  
 upper part of the  
 sample and lowest  
 in the lower part.  
 This is probably due  
 to the fact that the  
 substance is more  
 soluble in the  
 upper part of the  
 sample.
